## Personal Summary

As a resilient and self-motivated backend developer, I embarked on my programming journey fueled by a desire for intellectual challenge and a career that offers both personal growth and financial reward. My latest project, a Django REST framework-based messaging system similar to email, exemplifies my ability to tackle complex problems and deliver functional, user-centric solutions.

One of my core challenges has been overcoming the perception that a formal degree is essential for success. I thrive in an independent learning environment and feel constrained by traditional educational structures. My belief in the possibility of finding a company that values skills and passion over formal education is what keeps me going.

My career goals are centered around remaining in the programming field, continually enhancing my skills to solve increasingly complex problems and pushing my own limits. I believe my strengths lie in my mental resilience, highly developed sense of personal responsibility, and communicative versatility, which allows me to engage effectively with diverse groups of people. My flexible mindset, adaptability to change, and a strong desire for personal development are the cornerstones of my professional persona.

In this dynamic tech world, I am committed to staying at the forefront of backend development, constantly learning and evolving, ready to contribute my unique perspective and skills to a forward-thinking organization.

## Skills

### **Programming**

JavaScript, Python

### **Frameworks and Libraries**

Django, Django REST Framework, Node.js, Express, React

### **Frontend Technologies**

Html, CSS

### **Development Tools and Platforms**

Git, Jupyter Notebook

### **Databases**

MongoDB, SQL

### **Software Development Concepts**

Web API, OOP, MVC

## Soft Skills

- **Mental Resilience:** Demonstrated through self-taught journey and overcoming industry challenges.
- **Personal Responsibility:** Highly developed sense of ownership over projects and outcomes.
- **Communication:** Skilled in engaging effectively with diverse teams and clients.
- **Adaptability:** Flexible in thought and approach, easily adjusts to new challenges and changes.
- **Desire for Personal Development:** Committed to continuous learning and professional growth.

## Professional Experience

- Android Developer - Helicon Books Technology **2016-2017**  
Maintaining an existing application, adding features, debugging, updating versions and improving performance.

## Education

- Open University **2016-2017**  
B.A. Computer Science
- HackerU College **2015-2016**

## Military Service

- Aircraft technician **2013-2015**
