Summary

My favorite thing in life, the purpose of my life is problem solving, in any field not only in programming.

I think that programming is the best way i know to work in what i love the most.

In my perspective, every person should develop their ability to solve problems, so i instill my attitude in everyone around me.

I believe that with my attitude and abilities i can be an asset to your company.

I have a great understanding in the process of develop both client and server sides, i'm a dynamic, possessing strong creative thinking skills, i know how to work closely with others, i'm dedicated to constantly improving myself to maximize productivity and quickly respond to changing.
